

ARCADIA EIGHT LTD

Welcome to ARCADIA EIGHT LTD, your trusted partner in renewable energy and fuel options distribution. We specialise in providing top-quality petroleum derivatives and refined products to clients worldwide.

Our commitment to excellence and innovation sets us apart in the energy industry.

About Renewable Energy & Fuel Options Distributor

Expertise

We offer in-depth knowledge of petroleum derivatives and refined products distribution.

Focus

Our primary products are EN 590 and Jet Fuel A1, delivered across major ports.

Efficiency

We streamline the fuel purchasing process for international clients.

Standards

Our business reflects our commitment to excellence and high performance standards.

Our Services

1

Market Niche

We identify and capitalise on opportunities along the energy supply chain.

2

Partnerships

We establish long-term relationships based on transparency and mutual respect.

3

Direct Supply

We maintain direct credibility with refineries, ensuring product delivery to customers.

4

Global Distribution

We prioritise existing consortiums to increase petroleum and energy product distribution.

Our Approach

Quality Service

We strive to exceed customer expectations with our high-quality services.

Innovation

Our approach involves constantly adapting to market changes and technological advancements.

Sustainability

We prioritise environmentally friendly practices in our operations and product offerings.

Our Products: EN590 Diesel

- 1 European Standard**
EN590 Diesel meets the European standard for automotive diesel oil.
- 2 Low Sulphur Content**
The 10 PPM specification indicates a maximum sulphur content of 10 parts per million.
- 3 Environmental Benefits**
Ultra-Low Sulphur Diesel (ULSD) contributes to reduced emissions and cleaner air.
- 4 Wide Compatibility**
EN590 Diesel is suitable for most modern diesel engines, ensuring versatility.

Our Products: Aviation Fuel

Product	Type	Primary Use
JP 54	Kerosene-based	Military aircraft
Jet A1	Kerosene-based	Commercial aviation
Jet A	Kerosene-based	Domestic US flights

Additional Product Offerings

Petroleum Coke

A carbon-rich solid derived from oil refinery coker units or other cracking processes.

Bitumen

Available in grades 60/70 and 80/100, primarily used in road construction and waterproofing.

Industrial Applications

Our products serve various industrial needs, from construction to manufacturing.

Automotive Gas Oil (AGO)

1

Composition

AGO is a by-product of crude oil, obtained from the mid-boiling range of refining.

2

Safety

It is less flammable compared to other petroleum products like premium motor spirit.

3

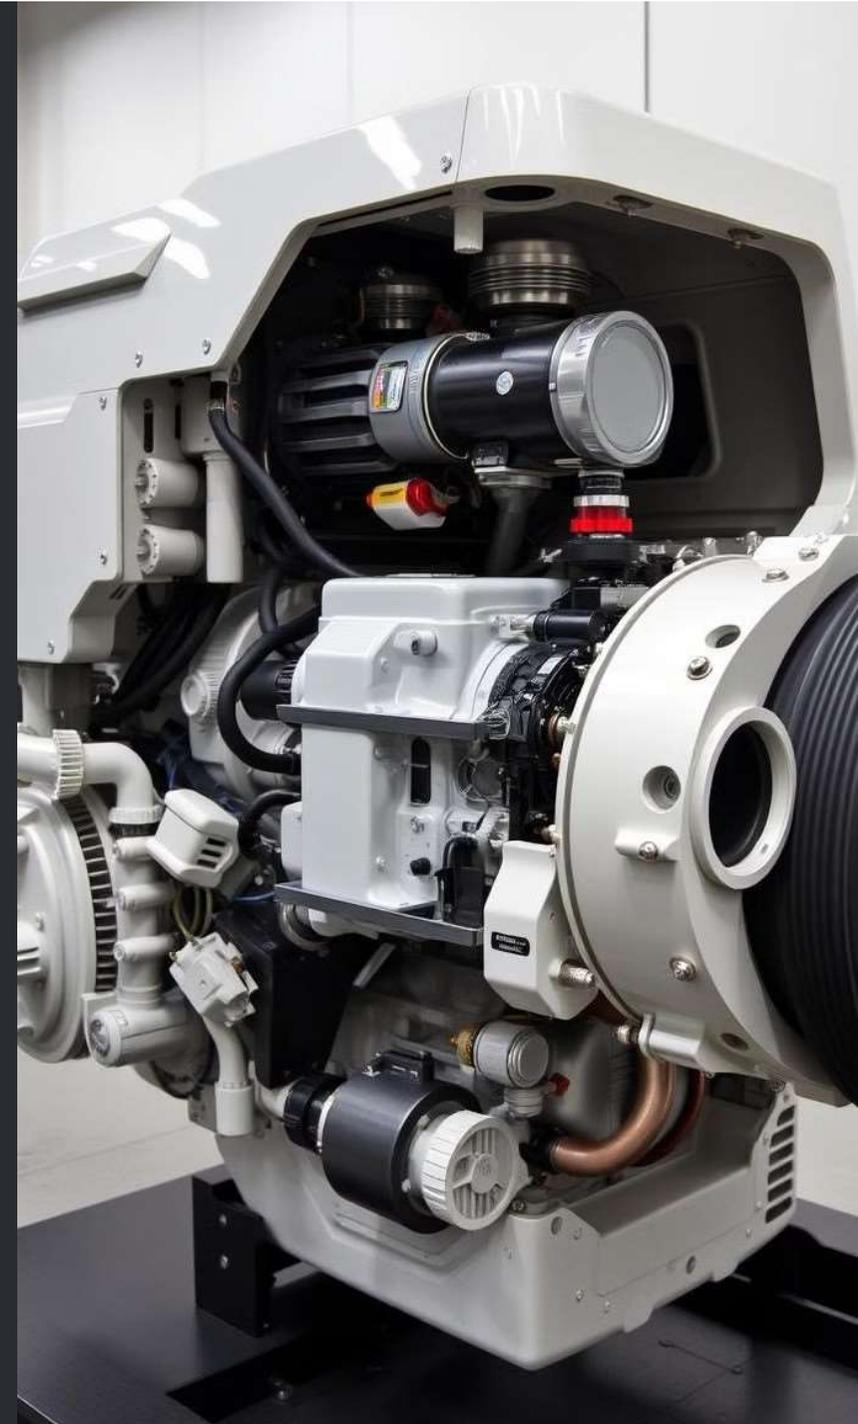

Applications

Widely used in diesel engines for transportation and industrial purposes.

4

Efficiency

Known for its energy density and fuel efficiency in heavy-duty applications.

Speciality Fuels: D6 Virgin Fuel Oil

High Viscosity

D6 Diesel is a high-viscosity residual fuel oil, also known as Bunker Fuel Oil.

Preheating Required

It needs preheating to 220-260°F before use due to its thick consistency.

Primary Applications

Mainly used in power plants and large ships for its cost-effectiveness.

Global Variations

Known by different names worldwide, but consistently used for heavy-duty operations.

Fuel Oil CST

1

Composition

Heavy fuel oil with high viscosity and density, derived from petroleum.

2

Applications

Used in shipping, power generation, manufacturing, and industrial heating.

3

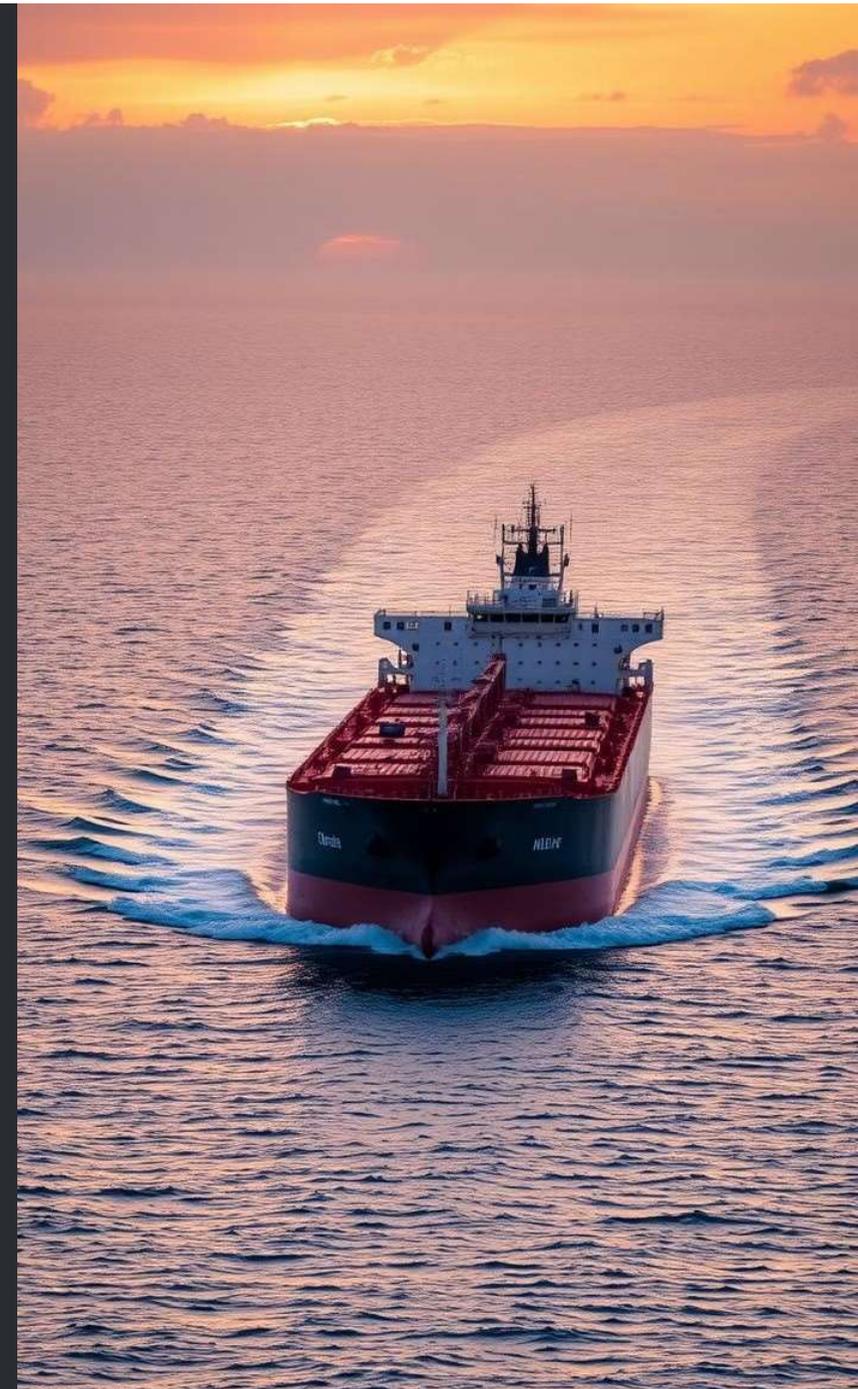

Varieties

Available in different grades: CST 180, CST 240, and CST 380.

4

Benefits

Provides a dependable and cost-effective energy source for large-scale operations.
